The image shows a computer monitor displaying the GDIAnalytics dashboard for the Twitter account @unliqindonesia. The dashboard is titled "Activity & Impact" and shows data for the period "10 Jul 2017 - 17 Jul 2017".

The main chart, "Post, Contributor, Reach & Exposure", displays four metrics over time (Mon 10/jul to Mon 17/jul):

- Post:** Represented by a blue line, showing a relatively stable trend around 1,000.
- Contributor:** Represented by a red line, showing a slight downward trend from approximately 800 to 600.
- Reach:** Represented by a green line, showing a slight upward trend from approximately 1,000,000 to 1,100,000.
- Exposure:** Represented by a yellow line, showing a slight upward trend from approximately 1,100,000 to 1,200,000.

The secondary chart, "Engagement", displays two metrics over time (Mon 10/jul to Mon 17/jul):

- Like:** Represented by a blue line, showing significant fluctuations with peaks around 13,000 and 14,000.
- Comment:** Represented by a green line, showing a relatively stable trend around 1,000.

The right sidebar provides summary statistics:

- Post, Contributor, Reach & Exposure Summary:**
 - Total Post: 2,218 (Avg. 277.25 /day)
 - Total Contributor: 245 (Avg. 39.62 /day)
 - Total Reach: 1,312,911 (Avg. 164,113 /day)
 - Total Exposure: 13,118,223 (Avg. 1,639,777 /day)
- Engagement Summary:**
 - Total Likes: 55,891 (Avg. 6,986 /day)
 - Total Comments: 1,363 (Avg. 170 /day)
- Preview:** A grid of image posts.

ANRX

You are not a sketch.

INTRO

Menurut data yang dikutip situs womenfitness.com, 90% dari penderita anorexia adalah perempuan. Sekitar 30% penderita anorexia mengalami gangguan ini seumur hidup, dan hampir semuanya pernah mengalami fase yang membahayakan nyawa mereka. Setiap dua ratus perempuan dalam populasi umum, satu hingga enam orang mengidap anorexia. 5%-18% dari penderita akan meninggal akibat gangguan ini, hal ini terutama terjadi pada remaja. Anorexia merupakan gangguan pada pola makan. Seperti yang kita tahu bahwa kematian pada pengidap anorexia sangat tinggi dari waktu ke waktu, terutama pada remaja. Anorexia merupakan gangguan pada pola makan dan rasa takut yang berlebihan terhadap peningkatan berat badan akibat pencitraan diri yang menyimpang. Katakan tidak pada anorexia! untuk mengurangi angka kematian dini pada remaja.

ABOUT US

Krisis ketidakpercayaan pada diri sendiri rupanya dapat berpotensi pada gangguan kesehatan fisik manusia, terutama ketidakpercayaan diri atas bobot berat badan sendiri. Hal ini biasanya dijadikan alasan para orang-orang yang melakukan diet untuk mencapai rasa kepercayaan dirinya. Cara apapun dapat dilakukan mereka untuk mencapai berat badan yang ideal, sehingga "salah kaprah" pada pola diet hingga pola pikir sangat mungkin terjadi. Inilah yang dialami oleh penderita anorexia, mereka diawali dengan ketidakpercayaan atas bentuk dan berat badan sendiri. Mereka selalu merasa gemuk padahal diri mereka sendiri telah kurus, hal ini dapat menjadikan penderita mengalami penurunan berat badan yang drastis, sebab cara apapun dilakukannya untuk merasa dirinya kurus, salah satunya dengan cara membenci makanan. Namun para penderita anorexia tidak menyadari bahwa hal yang dilakukannya dapat menjadikan hidup mereka berujung kematian. Tak jarang kita temukan dikalangan anak muda sekarang khususnya wanita yang sedang mengalami pubertas selalu merasakan hal demikian.

Hal inilah yang melatar belakangi kami untuk menulis artikel-artikel mengenai anorexia nervosa, kami ingin memberi informasi para pembaca untuk mengetahui apa itu anorexia dan hal-hal yang berkaitan dengan anorexia. Dengan harapan bacaan ini dapat menjadikan motivasi dan solusi para pembaca yang selalu merasa tidak percaya pada diri sendiri dan rela melakukan cara apapun agar terlihat kurus. Secara istimewa kami ucapkan terimakasih kepada dosen PR Online, bapak Syafiq Bani Assegaff yang telah membimbing kami sehingga kami dapat membuat website ini dengan baik.
