Hey Airbnb,

I am a software engineer and I am very interested in your open **Front-End Engineer** position.

This cover letter may seem like a canned response, but trust me it is not. I researched your company, read the job description twice and then asked myself "Will I be happy and productive if I work here?". The answer was "Yes". So here we go :-)

If you review my portfolio (http://timurcatakli.github.io) you will also agree with me that I have an **eye for design** and **UX**. My **Ruby on Rails**, **JavaScript**, **SQL** and related framework (**ReactJS**, **Angular.js**) skills are pretty good, too.

Beside my skills above, I also bring the following to the table: 10+ years of tech experience, project & product management experience, strong understanding of SEO, SEM, Affiliate Management, eCommerce strategies. Pair programming, engineering empathy and, TDD. I think I would be a great fit for this role so you should definitely meet me or at least send me a technical challenge. Don't make it so hard though :-)

I have attached **my résumé** for your review and would welcome the chance to speak with you sometime.

You can best reach me by email at timurcatakli@gmail.com or by phone at 415-867-8407. Thank you very much, and I look forward to hearing from you soon.

Sincerely,
Timur Catakli
PS: Did I mention that I am a US Citizen
